RE: Advisory Opinion Request

To whom it may concern:

I have recently worked as an Engineer Intern II for the Department of Health – Office of Public Health – Engineering Services. My office was located at 5604-B Coliseum Blvd., Alexandria, LA 70303. I am currently looking for work and want to see if there will be a conflict with possible future employment and the Louisiana Code of Governmental Ethics regarding post-employment.

In my position, I reviewed plans and specifications turned in by engineers concerning changes and additions to be done for water and sewer systems.

My inquiry is if I were to take a job with a private engineering firm, can I create engineering plans or participate in creating plans for a project that will have to be submitted to DHH – Engineering Services for permitting? Can I work for a private engineering firm as long as the projects that I work on will not involve DHH?

Thank you for your time and consideration.

Sincerely,

Divina Lanclos
